

SKILLS

WORK EXPERIENCE

Expert Test Automation Engineer Fresenius Medical Care GmbH Deutschland

05/2024 - Present

Global leader in advanced dialysis machines and technologies for chronic kidney disease.

Schweinfurt, Germany

Additional Tasks

- Continues development and improvements of the test environment (HiL and SiL).
- Supervising a bachelor thesis for setting up a Dashboard for visualizing test benches and test results metrics and statistics.
- Setting up Azure DevOps testing pipelines for CD/CT.

Test Automation Engineer Fresenius Medical Care GmbH Deutschland

09/2022 - 04/2024

Global leader in advanced dialysis machines and technologies for chronic kidney disease.

Schweinfurt, Germany

Tasks

- Responsible for EXAM Test Automation Framework.
- Development and implementation of custom Python libraries necessary for testing.
- Main contact person for automation topics regarding the different software systems.
- Development and maintenance of the different test environment (HiL, SiL, UI)
- Supervised three bachelor thesis in the topics (SiL usage in the project, FPGA for dSpace HiLs, and the development of a new HiL setup using Vector)
- Keeping automation rate above 90% (percentage of automated test cases)

Bachelor Thesis - Design Concept and Implementation of GUI Automation for Dialysis Machine Fresenius Medical Care GmbH Deutschland

03/2022 - 07/2022

Global leader in advanced dialysis machines and technologies for chronic kidney disease.

Schweinfurt, Germany

Tasks

- Design concept and implementation of the automation of various GUI interactions
- Implementation of a search algorithm for automatic navigation through the various GUI pages
- Research and implementation of an efficient approach to extract GUI objects and deploy them in the test automation software EXAM
- Simulate multi-touch gestures

Internship - Test Automation Fresenius Medical Care GmbH Deutschland

10/2021 - 02/2022

Global leader in advanced dialysis machines and technologies for chronic kidney disease.

Schweinfurt, Germany

Tasks

- Development of a Python library for test automation of various functions of dialysis machines
- Extraction and analysis of XCP frames on CAN via CANape and COM API
- Proof-of-concept for standardizing the specifications of machine test cases and their automatic generation via EXAM test automation software

WORK EXPERIENCE

Tutor for "OOP Programming with C++" Course

Hochschule für angewandte Wissenschaften Würzburg-Schweinfurt (FHWS)

03/2021 - 02/2022

Faculty of Electrical Engineering

Tasks

- Preparation and implementation of programming exercises
- Supporting students with questions about C++ and Lab exercises

Mechatronics Intern

PepsiCo

05/2018 - 05/2019

Joud Co. PET - Bottling line for soft drinks

Tasks

- Installation, assembly and overhaul of machines such as the KRONES Contiform S16
- Maintenance of various devices, electronic components, actuators, control panels and sensors
- Reprogramming and online monitoring of the Siemens S7-300 PLC

EDUCATION

Bachelor of Mechatronics Engineering (IMC)

Hochschule für angewandte Wissenschaften Würzburg-Schweinfurt (FHWS)

09/2019 - 09/2022

Focus

- Automation and Robotics
- Automated Systems and Human-Machine Interaction

PERSONAL PROJECTS

Simple Smart Room - IoT (2025)

- Collecting sensors data (temperature, humidity) over Raspberry Pi and control room lighting
- Setup a server with Grafana and InfluxDB to monitor temperature and humidity over time

Arduino-Based Quadcopter (2016 - 2017)

- Built with Arduino, Raspberry Pi, brushless motors, Xbee (wireless modules), electronic speed controllers (ESCs), and a gyroscope with PID controller.

EXTRAS

Volleyball Bronze Medal (09/2010 - 06/2011)

3rd place in the local high school volleyball tournament

ISTQB Certified Tester - Foundation Level (09/2023)

German Testing Board e.V.

German Language Course A2 (11/2022 - 02/2022)

@ Inlingua

German Language Course B1 (01/2026 - Present)

@Goethe Institute
